

## *Zoning Permit Application Process*

*The purpose of a zoning permit application is to inform the City of Wauseon that an individual intends to make an improvement or change to their property and wants to ensure that they are doing it correctly.*

*The application allows the city to review the proposed project, including site plans and dimensions, to ensure that it complies with zoning regulations and setbacks.*

*It also serves as a way for the city to determine if any modifications or adjustments need to be made to the project to make it acceptable.*

*Once the application is approved, a zoning permit is issued, allowing the individual to proceed with the project, provided it does not require a separate building permit.*

*Thank You!*

*Danny Markley*
